

DISCOVER THE EFCO TRACTOR RANGE

The tractor is the fundamental helper for the care of large gardens, parks and public green areas. In these cases, having an agile and powerful vehicle can make the difference.

Efco tractors are **robust and extremely easy to handle**, equipped with **agile steering systems** that allow you to make even very tight turns. The ease of maneuvering near plants and shrubs allows for greater precision and speed in finishing.

They are also able to **adapt their movement based on the type of terrain**. Equipped with **hydrostatic transmission** which allows you to manage the speed by operating a pedal, without the need to stop or with **mechanical lever transmission**.

The different types of engine, **single-cylinder or twin-cylinder**, offer different **powers based on the models**, so as to always make them suitable for the extension and type of surface you intend to cut.

Rider

Designed for small and medium surfaces, **up to 4,000 m²**. Compact and easy to handle (they have the engine in the rear position) they allow you to move easily and precisely in gardens with plants or in the presence of obstacles.

Side discharge

Ideal for surfaces of **up to 8,000 m²**, they are characterized by greater construction simplicity as they do not collect grass but simply cut it or chop it using the mulching function.

Rear discharge

They allow you to collect grass using large collection baskets; having cutting widths of up to 125 cm and also being powered by twin-cylinder engines, they can be used on gardens of **up to 9,000 m²**.

Professional all-terrain

Designed for cleaning uncultivated areas with dense vegetation, rough or sloping terrain when grass collection is not necessary. Also available with 4x4 transmission, they can easily cover surfaces of **up to 10,000 m²**.

Rider

Designed for small and medium surfaces, **up to 4,000 m²**. Compact and easy to handle (they have the engine in the rear position) they allow you to move easily and precisely in gardens with plants or in the presence of obstacles.

Plus point

Vertical storage

Save space! You can store the ride-on mower in a vertical position during the storage period.

Electromagnetic clutch

The engagement of the electromagnetic clutch occurs quickly and silently with a simple touch of a convenient button on the control panel.

Telescopic lever for emptying the bag

The telescopic lever is easily reachable from the driver's seat. It allows you to tilt and empty the full bag without any muscular effort and without having to twist your torso.

Lever for cutting height adjustment

The adjustment lever is comfortable and easy to reach, with a graduated scale that lets you see immediately the desired cutting height.

Technical data

Model	 ZEPHYR 72/12,5 K H	 ZEPHYR 72/13 H
Displacement	413 cm ³	344 cm ³
Cutting width	72 cm	72 cm
Number of blades	1	1
Engine make/model	Emak K 1250 AVD	B&S Powerbuilt 3125E AVS series
Cutting height	30-80 mm, 7 positions	30-80 mm, 7 positions
Propulsion	hydrostatic	hydrostatic
Speed (km/h)	from 0 to 8.6 km/h in forward drive - from 0 to 3.2 km/h in reverse	from 0 to 8.6 km/h in forward drive - from 0 to 3.2 km/h in reverse
Turning radius	45 cm	45 cm
Bag capacity	180 L	180 L
Overall dimensions	198×73×110 cm	198×73×110 cm
Plus	< 4000 m ² , 3 cutting device, Deck wash	< 4000 m ² , 4 cutting device, Deck wash
Mulching/Side discharge	optional/optional	standard/standard
Weight	192 kg	192 kg

Side discharge

Ideal for surfaces of **up to 8,000 m²**, they are characterized by greater construction simplicity as they do not collect grass but simply cut it or chop it using the mulching function.

Plus point

Lever for cutting height adjustment

Our handy lever for adjusting the cutting height is within easy reach and equipped with a graduated scale. This feature allows you to immediately see the desired height level, with 7 positions available to achieve the perfect cut.

Electromagnetic clutch

The electromagnetic clutch engages quickly and quietly, thanks to a convenient button located on the control panel.

Quick connector "Deck Wash System"

The quick connector "Deck Wash System", located directly on the mowing deck, allows directing water inside to facilitate cleaning of the mowing apparatus.

Front bumper

The large steel front bumper provides robustness and solidity, protecting your ride-on mower from accidental impacts.

Rear discharge

They allow you to collect grass using large collection baskets; having cutting widths of up to 125 cm and also being powered by twin-cylinder engines, they can be used on gardens of up to 9,000 m².

Plus point

Cruise control

The 125 model comes standard with cruise control, allowing you to set a constant speed, optimizing work time.

Towing hitch included

The standard towing hitch makes your machine even more versatile, allowing you to easily tow a trailer or a lawn roller.

LED headlights

LED headlights with daytime running light function ensure high visibility even in low light conditions.

Reduced turning radius

The reduced turning radius allows you to move easily around ornamental plants and shrubs, avoiding unnecessary and difficult reversing or repositioning of the machine.

Professional all-terrain

Designed for cleaning uncultivated areas with dense vegetation, rough or sloping terrain when grass collection is not necessary. Also available with 4×4 transmission, they can easily cover surfaces of **up to 10,000 m²**.

Plus point

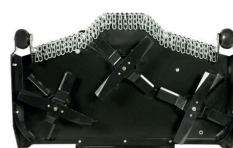

Self-locking differential

The self-locking differential ensures maximum traction in any terrain condition and slope.

Maximum safety guaranteed

The TONKAWA model comes standard with a rollbar, front and rear bumpers, side protections, and safety belts. These features ensure maximum safety during operations, even in the most complex situations.

110 cm deck with mulching blades

The TONKAWA model is equipped with a 110 cm deck featuring 3 rotors and 6 mulching blades. This system finely shreds all types of grass and shrubs, ensuring an effective and clean cut.

Maximum stability on any terrain

The large tread and the low center of gravity of the machine ensure maximum stability, even on steep terrains or near edges and ditches.
