

our power, your passion

NEW
BLOWER
SA 9000

The powerful new SA 9000 blower is designed to provide the maximum operator comfort and optimal performance in accordance with the working situation: clearing of urban spaces or, in agriculture, as an aid when gathering olives, fruit or other freshly fallen produce.

ERGONOMICALLY DESIGNED DOWN TO THE SMALLEST DETAILS

- The backpack is designed to restrict weight and machine oscillation in order to minimise vibrations transmitted to the operator.
- The controls are readily accessible and the control handle can be easily adjusted in accordance with operator stature.

MAIN FEATURES

- 2-stroke 5 HP engine with recoil starting.
- High performance in terms of air flow (27 m³/min) and air speed (105 m/sec) to allow rapid and efficient clearing and collection operations irrespective of ground conditions.
- Lightweight corrosion-resistant anodized aluminium frame.
- Fixed throttle lever positioning to set engine rpm in compliance with working requirements.
- Large high-capacity long-life paper air cleaner for all types of working environments, even with very high dust levels.
- Two air delivery nozzles supplied as standard: rectangular/round section, both equipped with hemispherical support so the tube can rest on the ground on level terrain to reduce operator fatigue.
- All screws on the machine share the same type of head so all servicing tasks can be carried out using a single wrench.

TECHNICAL DATA

POWER	5.0 HP – 3.6 kW
DISPLACEMENT	77 cm ³
MAX AIR FLOW	27 m ³ /min
MAX AIR SPEED	105 m/sec
FUEL TANK CAPACITY	2.3 litres
SOUND PRESSURE/POWER LEVEL	103/115 dB(A)
VIBRATION LEVEL	< 2.5 m/s ²
DRY WEIGHT, INCLUDING BLOWER TUBES	11.2 kg
