

DISCOVER THE ROBOT MOWER RANGE

## EFCO ROBOT MOWER RANGE

Are you looking for a practical, intelligent and **low environmental impact** solution to care for your garden? Our new range of **robot mowers** is here to help you out! With the **R 500i**, **R 1000i** and **R 2000i models**, mowing the lawn will become a simple and automated process. The robots have **dual blades** that finely chop grass and return it to the soil as **natural fertiliser**, improving the health of the lawn and avoiding the need to dispose of waste.

Each model is equipped with the **Flex Cut system** to optimise its speed based on the grass height, as well as a **rain sensor** that pauses work when it detects wet weather. The robots can be **managed remotely** using the **free EfcO Robot Mower app**, which lets you customise cutting functions, schedule mowing and rest activities in the calendar, and much more. Available in three variants, these machines are designed to work on **lawns of various size** (up to 2,000 m<sup>2</sup>) and **complexity**, ensuring maximum user comfort and efficiency.
